MMS is a level 1 BBEE contributor and intends to maintain this level by ensuring compliance with all B-BBEE scorecard elements.

ABOUT MALOPE MONITORING SOLUTIONS

Malope Monitoring Solutions (MMS) is a South African based technology company which was founded in 2018 by the former CEO of Zonke Monitoring Systems (ZMS). ZMS provided monitoring services to the National Gambling Board and the gambling industry for more than 14 years. ZMS was also the sole distributor of Key Storage Incorporated products on the African continent.

MMS has not only built on the experiences gained from ZMS; we have also expanded our products and services, beyond the gambling industry. MMS has positioned itself as key suppliers for monitoring solutions. Our solutions are geared towards improving accountability, compliance, efficiency and security.

If your company needs anything monitored, MMS is your first port of call.

The advent of Covid19 prompted MMS to look into other products and services; i.e. digitation of manual systems.

MMS personnel are highly experienced in the Information Technology and regulatory space with a cumulative experience exceeding fifty (50) years.

VISION, MISSION AND VALUES

Vision

To be the Leading Provider of Secured Electronic Compliance Monitoring and IT Solutions in Africa.

Mission

To improve Compliance, Efficiency and Security for our clients.

Values

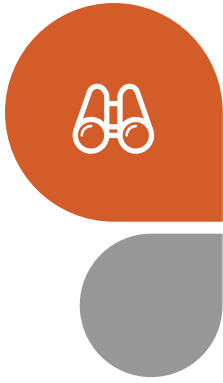

- World class service
- Integrity
- Innovation
- Respect
- Efficiency

COMPANY STRENGTHS

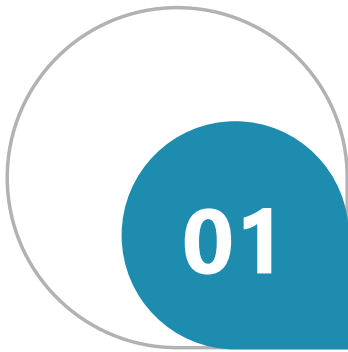

MMS strengths include the following:

- Innovation
- Software and Hardware Integration
- Data Security and Segregation
- Understanding of regulatory compliance framework
- Professional Customer Support

PRODUCTS AND SERVICES

MMS provides the following products and services to various sectors which include Government, Mining, Security, Tertiary institutions, Gambling Industry, Logistics, etc.

Software Development

MMS is known to employ some of the top software developers in the industry. Some of the products developed are deployed locally and internationally. Internationally our products are installed in Australia, Rwanda, Uganda, Tanzania, and may others.

Solutions developed by MMS include:

➔ **Electronic Registers** - A web-based solution on a handheld terminal which replaces manual books for recording various transactions generated at site.

➔ **Central Electronic Monitoring System** which monitors compliance in the gambling industry.

Central Electronic Monitoring Services

MMS operates, maintains, and supports the Central Electronic Monitoring System (eMonitor) that operates in some African countries as well as Queensland, Australia. MMS personnel provides first level support for Operators in Africa and second level support for the Australian operation.

eMonitor is a web-based application which communicates remotely with each gaming machine. A non-proprietary device, referred to as the Machine Control Unit (MCU) is placed in each machine being monitored.

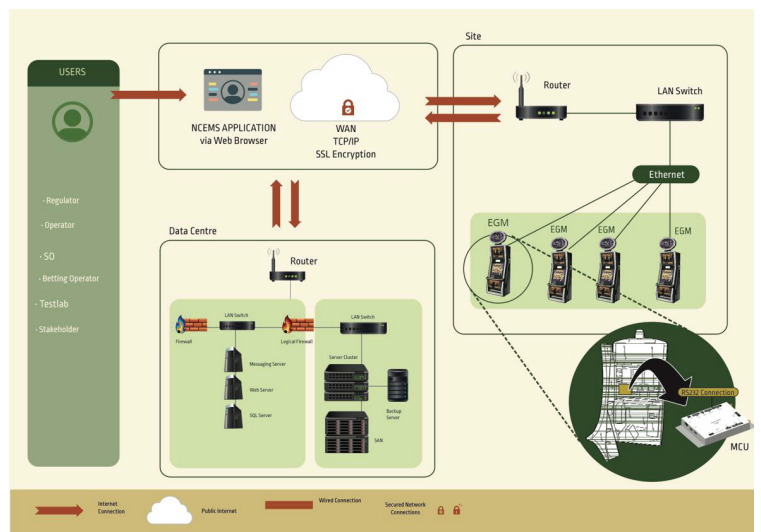

The MCU collects events, meters, etc. on a real-time basis from the gaming machine and in turn passes same to **eMonitor** host.

Communication between **eMonitor** Host and gaming machines is bi-directional. Instructions such as enable, disable, install, uninstall, get meters, etc. can be issued by the user when necessary.

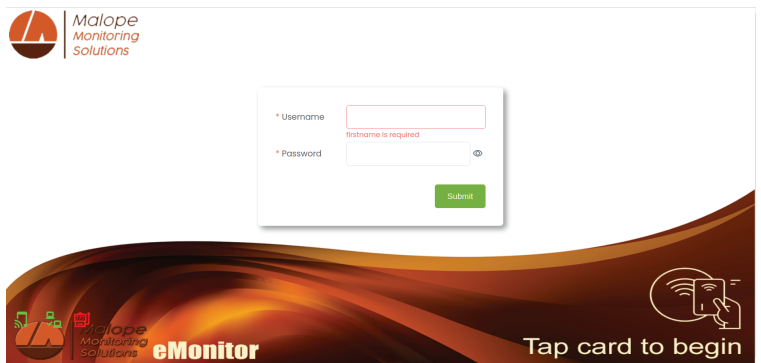

Operators of multiple sites are therefore spared trips to inspect their operations as information on their entire operation is available from anywhere, anytime.

Over and above monitoring, MMS also provides a card-based cashless solution. For Operators wanting to ease the pain of pay-outs when the player cashes out, MMS cashless solution is the answer. Player cards can also incorporate loyalty if required.

Electronic Asset and Key Control

03

MMS is the sole distributor of Electronic Key Control products on the African continent. Our supplier, Key Systems Incorporated (KSI), is based in Victor, New York in the United States of America. KSI was founded in 1987 and has been operating in this field for more than 34 years.

KSI is an Engineering company with distributors throughout the world. Their goal is to provide solutions to customers, rather than just products. Their clients include Mines, Casinos, higher learning institutions, government agencies such as the US Defence Force, Correctional Services and many more.

MMS has to date deployed some of these products in Mines, Universities, Casinos, etc. The Key Boxes and lockers are connected to a Web-based application, GFMS (Global Facilities Management System), which can be cloud-based or installed on client premises.

To ensure accountability and improved security, MMS often recommends that access to Key Boxes and Lockers be by a combination of PIN and Biometric reader.

Custom solutions can also be made to order.

Mobile Workforce Solutions

04

MMS is the distributor of Digital Security Concepts Inc. Digital Security Concepts Incorporated products in South Africa. DSC Inc. was founded in 1987 with the objective of providing simple, effective and secure solutions for the management of field workers. That is when Tour Trax was created.

Tour Trax has several solutions used by management and staff in various sectors to ensure Proof of presence, Time & attendance tracking, Digital forms, VOIP and Device Management and service providers.

The agreement with Digital Security Concepts enhances our products offerings in the monitoring and compliance space.
